

Memories of Wilhelm Scholê

One of my best memories of the Scholê is of Ms. Viais, our math teacher. She really made math come alive. She made the class both interesting and fun. Because of her, I had a strong foundation that has been invaluable. I also remember learning about different artists, their lives, and their works. We went to museums many times to see their art and then returned to the school and recreated their masterpieces. We would brainstorm and come up with poems about their lives and their art. I enjoyed being with my friends and playing together. I remember putting on plays. We were always doing something. It was important for all of us to work together because we knew everything good must have harmony and balance. Overall, my years at Wilhelm helped me to understand and appreciate the importance of living with and the necessity of helping others.
